

# Data Visualization: Activity

QBS Bootcamp 2025

## In Class Activity

Using the same data we've generated in class thus far, recreate the following plot:

Hints:

1. The color palette is “Royal2” from the *wesanderson* package but can you think of how you might still reproduce this without knowing that?
2. You can change the font in a theme using variations of “text” which you can find in the documentation of the *theme()* function.
3. Look up the documentation for *geom\_hline* and *geom\_vline*.
